Amiea Med Skin Care

Microneedling is an amazing tool that triggers your skin to heal and regenerate by producing collagen, elastin, and glycosaminoglycans, such as hyaluronic acid.

To obtain the best results with microneedling therapy, **amiea med** has created a specific line of cosmetics.

These professional products are designed to:

Minimise the risk of irritation
and skin reactivity

Nourish the skin with proper
ingredients enabling
collagen synthesis

Reduce inflammation
and erythema

Maintain proper level
of hydration

What is inside? Sandalore

Healing smells like **sandalwood**

When performing microneedling, we are activating the wound healing process that naturally regenerates the skin, resulting in its thickening, firming, better bloodflow and skin tone. While it is doing its best job, there are ways to support it and optimise those processes. Sandalore is a synthetic sandalwood scent acting like a skin booster, significantly supporting skin regeneration and renewal. Used after microneedling (or other procedures), it will help the skin in numerous ways.

The **benefits** of using sandalore in your post-needling skin care:

1 **Promotes Skin Regeneration**

Enhances the proliferation and migration of keratinocytes, the cells responsible for skin regeneration.

3 **Improves Skin Barrier Function**

Protects the skin from further damage by strengthening the skin's barrier, as the skin is more vulnerable after treatment.

2 **Enhances Collagen Production**

Sandalore increases collagen synthesis. Studies suggest (Lee et al., 2022) that Sandalore can also boost collagen production, which is a crucial benefit in post-microneedling care. Microneedling itself stimulates collagen synthesis, and Sandalore can enhance this process, leading to improved skin elasticity and firmness.

4 **Reduces Inflammation**

Sandalore's anti-inflammatory properties helps to soothe the skin and reduce irritation, leading to a more comfortable recovery.

A photograph of several sliced pieces of aloe vera leaves floating in clear water. The slices are arranged in a way that shows their internal gel structure. The background is a soft, out-of-focus light blue and green.

Aloe, Bisabolol, Panthenol, Alantolin

A powerful post-microneedling care regimen that soothes the skin, reduces inflammation, promotes regeneration, and restores moisture. These ingredients help ensure that the skin recovers quickly and effectively, maximizing the benefits of the microneedling procedure while minimizing discomfort and potential side effects.

A close-up photograph of a green, gelatinous substance, likely Fucus vesiculosus extract, with small, dark, spherical structures visible within it. The background is a soft, out-of-focus light blue and green.

Fucus vesiculosus extract

It is a multifaceted ingredient that provides anti-inflammatory, antioxidant, hydrating, and healing benefits. These combined effects contribute to healthier skin that is able to produce and maintain collagen better. Additionally, it has strong brightening action and supports spot reduction helping the skin to maintain a youthful appearance.

A close-up photograph of a light blue, gelatinous substance, likely hyaluronic acid, with small, dark, spherical structures visible within it. The background is a soft, out-of-focus light blue and green.

Hyaluronic Acid

An ingredient that is widely known in skin care and aesthetics. It is highly beneficial after microneedling due to its hydrating, regenerating, and soothing properties. It enhances the result of the treatment, plumps and firms the skin and provides intense hydration, leaving the skin resilient, with improved texture and radiant complexion.

Give the skin what it needs: an excellent choice for post-microneedling care!

Bare Skin Cleanser

Size: **200 ml**

Product Description:

Bare Skin Cleanser

is formulated to prepare the skin for microneedling treatments. This non-drying, soothing cleanser removes impurities while maintaining the skin's natural moisture balance, ensuring it is clean and calm before treatment.

Use: Pre-microneedling treatment, post-treatment morning and evening routine.

Clinical Studies:

Research indicates that **Sandalore** has a significant calming effect, which can help reduce skin irritation and promote skin comfort. (Busse et al., 2014)

Studies show that **Bisabolol** effectively reduces skin inflammation and aids in skin healing processes, making it beneficial for sensitive and irritated skin. (Maurya et al., 2014)

Key Ingredients and Benefits:

Sandalore

Alleviating / Soothing / Anti-Bacterial / Anti-Microbial

Bisabolol

Alleviating / Soothing

Aloe Barbadensis Leaf Juice Powder

Hydrating / Alleviating

Face Relief Mask

Biocellulose Sheet Mask, 5x30ml

Product Description:

Soothe and rejuvenate your skin post-microneedling with the **Face Relief Mask**. This specially formulated biocellulose mask provides immediate relief and hydration, ensuring your skin recovers quickly and maintains its natural glow.

Use: Directly post-microneedling treatment, at home whenever the skin needs an extra hydration and relief.

Key Ingredients and Benefits:

Hyaluronic Acid

Moisturising / Plumping

Betaine

Moisturising / Irritation Reduction

Vitamin B5 (Panthenol)

Soothing / Irritation and Redness Reducing / Moisturising

Allantoin

Soothing / Cell Regeneration / Irritation Reducing

Olea Europaea (Olive) Leaf Extract

Antioxidant / Anti-inflammatory

Clinical Studies:

Allantoin is well documented for its ability to soothe and protect the skin, enhancing the skin's natural repair processes. (Fialho et al., 2011)

Studies indicate that **Panthenol** improves skin barrier function and provides significant soothing and healing benefits. (Ramos-e-Silva et al., 2020)

Olive leaf extract has been shown to possess significant antioxidant properties, helping to protect the skin from damage and reduce inflammation. (Romero-Márquez, J. M., et al., 2023)

Aloe, Bisabolol, Panthenol, Alantolin

Calm, cool, and glow with the **Face Relief Mask**
—your ultimate post-treatment rescue for refreshed, radiant skin.

Cell Activator Serum

Size: 50 ml

Product Description:

Enhance your skincare routine with the **Cell Activator Serum**, a powerful formula designed for use at home or post-microneedling treatments. This serum promotes skin regeneration and alleviation, providing the necessary care for your skin to recover and thrive.

Use: Post-microneedling treatment, morning and evening routine.

Clinical Studies:

Research indicates that **Sandalore** has a significant calming effect, which can help in reducing skin irritation and promoting skin comfort. (Busse et al., 2014)

The Leontopodium Alpinum Flower

/Leaf Extract has been shown to have significant antioxidant and anti-inflammatory properties, which help in skin regeneration and protection.

(Choi et al., 2020; Cogălniceanu et al., 2022)

Key Ingredients and Benefits:

Sandalore

Alleviating / Soothing / Anti-Bacterial / Anti-Microbial

Salicylic Acid

Dead Cells Removal

Leontopodium Alpinum Flower / Leaf Extract

Regeneration / Anti-inflammatory / Antioxidant

Fucus Vesiculosus (Bladderwrack) Extract

Antioxidant

Skin Repair Moisturiser

Size: 50 ml

Product Description:

The **Skin Repair Moisturiser** is a carefully formulated product designed to provide optimal skin care following needling procedures and for at-home use. It is enriched with a blend of hydrating, soothing, and regenerating ingredients that work together to enhance the skin's natural healing process, ensuring a smooth, hydrated, and rejuvenated complexion.

Use: Post-microneedling treatment, morning and evening routine.

Key Ingredients and Benefits:

Hyaluronic acid, safflower and jojoba oils
Moisturising / Smoothing

Capric Triglyceride, phosphatidylcholine
restore
Protecting / Moisturising

Lactic Acid
Mild exfoliation

Tocopheryl Acetate, Tocopherol, Bladderwrack Extract, Phytic Acid
Antioxidant

Sandalore, Leontopodium Alpinum Flower / Leaf Extract
Inflammation Reduction / Faster Recovery Promotion
/ Collagen Production Supporting
